

weSTEAM

The Idaho Environmental Coalition established the weSTEAM program to engage the community and create positive awareness of Science, Technology, Engineering, Math, and the importance of Arts within these fields.

weSTEAM cultivates, trains, funds, and dispatches a talented pool of volunteers to introduce a variety of STEAM subjects and careers to a young audience.

weSTEAM provides the training necessary to help volunteers effectively communicate technical information to a young audience.

weSTEAM fosters collaborative relationships with other community organizations such as museums, zoos, and civic organizations.

For more information on weSTEAM and how to get involved, please contact: Kevin Young | kevin.young@icp.doe.gov or Carl Gaufin | carl.gaufin@icp.doe.gov
